Pinpoint Labs Software  
SAFECOPY 2

Forensically collect data quickly and easily to meet today's ediscovery demands.

# Now Apply the Same Defensible Principles Used by the "Fat Cats" in Forensic Collections to All Your Cases for a Fraction of the Cost

Preserve chain of custody and all metadata even with your smaller, more challenging cases where the cost of ediscovery has been prohibitively expensive -- all for a fraction of the cost and with no need to incur travel costs.

#### FORENSICALLY SOUND FILE COLLECTION

Incomplete and undocumented electronic discovery collections occur every day. The result of mishandling these files can be costly to both the client and their legal counsel. Proper file collection methods should be discussed at the beginning of each case.

When collecting electronic discovery, you should use processes and applications that preserve and verify collected electronic files with minimal impact on client systems. Without these, creating defensible and verifiable electronic discovery productions and evidence authentication is difficult, if not impossible.

#### SAFECOPY 2 FEATURES:

- Select from multiple data sources (e.g. file shares, individual files or file list)
- Supports paths greater than 255 characters (up to 32,000)
- Detects and resumes after network outages
- Real time error display
- 100% file copy verification (using MD5 hash comparison)
- Preserves file system timestamps and metadata
- Filters by file extension (inclusion, exclusion and use file extension list)
- Filters by date range
- Desktop, Mobile, Server and Nomad editions

Operating System	Other
SafeCopy 2 Desktop Edition (SC2DT)	<p>SafeCopy 2 has a unique bit stream copy engine that preserves file contents, timestamps and metadata while creating an electronic chain of custody and using MD5 hash verification. SafeCopy also works with Robocopy and greatly simplifies commonly used features.</p> <p><b>SafeCopy 2 Desktop Features:</b></p> <ul style="list-style-type: none"> <li>• Installed on the local computer</li> <li>• Licensed to a single system</li> <li>• Capable of accessing all local and networked devices</li> </ul>
SafeCopy 2 Nomad Edition (SC2NE)	<p>SafeCopy 2 Nomad provides a remotely deployed, license which runs from USB flash drives, external hard drives, or desktop computers. Now you can make forensically sound copies of files on cases across town or across the world!</p> <p><b>SafeCopy 2 Nomad Features:</b></p> <ul style="list-style-type: none"> <li>• Easily distribute a SafeCopy 2 license</li> <li>• Perfect for a one time or short term collection project</li> <li>• Hassle free – No USB drive or software to track or return</li> <li>• Runs from external hard drive, flash drive or desktop computer</li> <li>• Create job file for automated collection</li> </ul>
SafeCopy 2 Mobile Edition (SC2ME)	<p>SafeCopy 2 Mobile Edition allows you to perform data collections on any PC where you can plug in a USB device. Utilizing the U3 platform for portability and security, SafeCopy 2 will run from U3 compatible flash drives, also known as “U3 Smart Drives,” eliminating the need to install the software on servers or client machines. Without the need to install on the host machine, SafeCopy 2 Mobile Edition leaves no “footprint”. Now you can take all the features and functionality of SafeCopy 2 wherever you go.</p> <p><b>What is U3?</b> U3 is a standalone application environment that allows users to install and run software directly from a USB device. SafeCopy 2 Mobile Edition is perfect for file collection, acquisition or even in-house use when you need the freedom to use SafeCopy 2 wherever you choose.</p> <p><b>SafeCopy 2 Mobile Features:</b></p> <ul style="list-style-type: none"> <li>• Portable between computers</li> <li>• Runs from U3 USB device</li> <li>• No installation required</li> </ul>
SafeCopy 2 Server Edition (SC2SE)	<p>If you need a company-level license that allows you to use SafeCopy 2 on your network, then the SafeCopy 2 Server Edition is a great solution. If you need to copy files from client and server computers in remote offices, or run multiple jobs from a single computer. Other users prefer to be able to access SafeCopy 2 without using a USB flash drive.</p> <p>Whether you need to compliment your existing SafeCopy 2 licenses, or you are a new customer, we know you will find SC2SE a great tool for ESI file collections and network copies.</p> <p><b>SafeCopy 2 Server Features:</b></p> <ul style="list-style-type: none"> <li>• Simplifies network (including remote) collections</li> <li>• Is accessible from a server, shared location or NAS device</li> <li>• Doesn't require local installation</li> <li>• Runs from remote servers and client machines</li> <li>• Run multiple jobs from the same system</li> </ul>
